

ENABLING NEW REVENUE STREAMS

✓ UTILITIES

✓ FACILITY MANAGERS

✓ CONSUMERS

How EnergyRadar support new business opportunities

1

Utilities

- Offering digitalized energy services to their customers
- Turning costumers in loyal consumers
- Optimizing the grid balance due to forecasting on real-time values

2

Facility Manager

- Empowering a transition into full-service energy suppliers
- Offering solar power to their customers
- Integrating different energy sources in one solution

3

Consumer / Prosumer

- Getting a deep inside view on their energy usage
- Optimizing energy consumption by shifting usage to off-peak hours
- Creating awareness of the CO₂ footprint and the impact on the environment

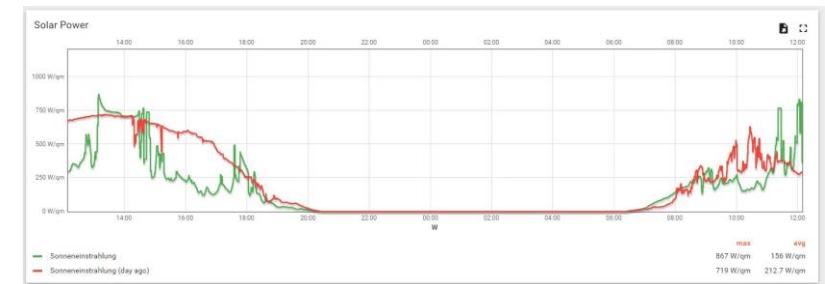

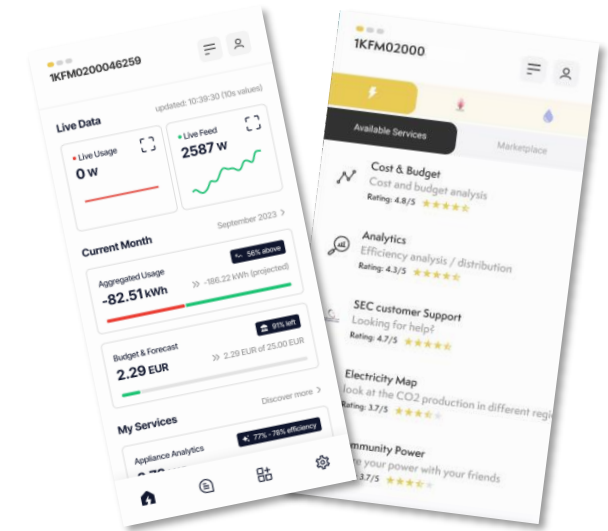

1

Business opportunities for utilities

Integrating different services to offer meaningful experience to customers:

- Cost and budget monitor
- Analytics
- Integration of charging stations, solar stations

It enables **better grid management** by predicting demand fluctuations, thereby allowing for more efficient distribution.

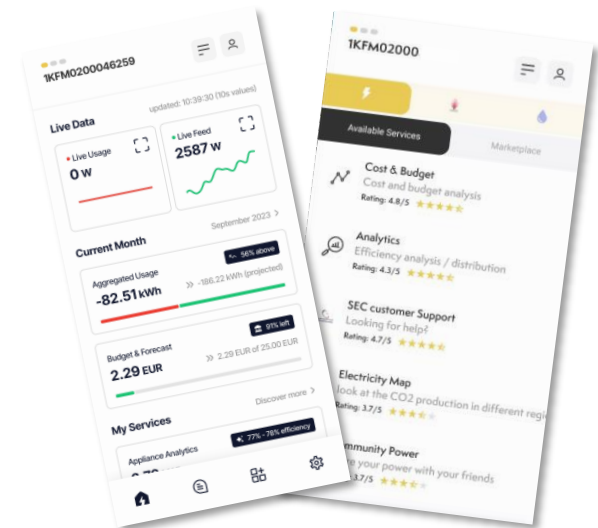

2

Business opportunities for facility manager

Integrates different energy sources to offer the best prices of:

- Power
- Gas
- Water
- Heat
- Solar power
- Power for heat pumps and charging stations

It enables **better energy management** by predicting demand patterns of their customers.

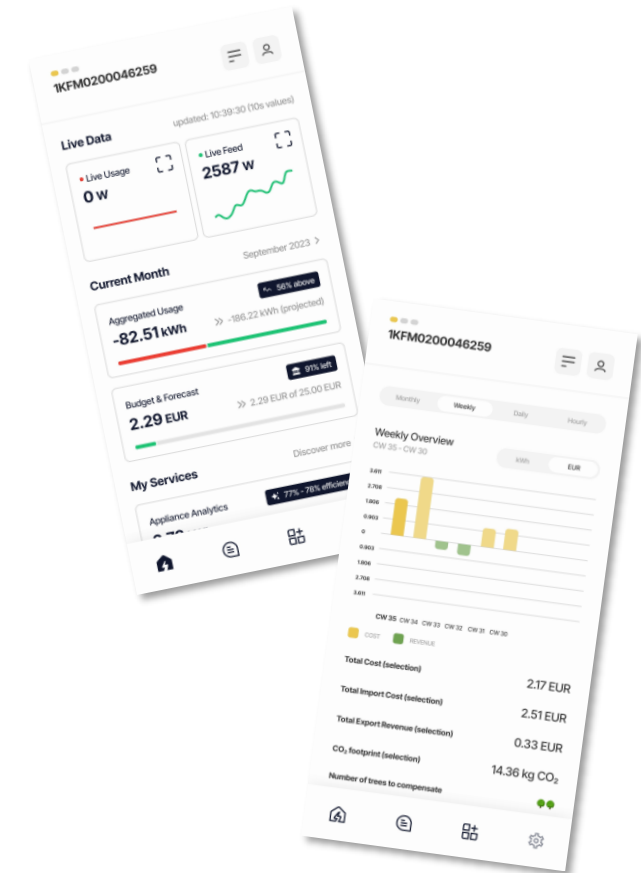

3

Savings for consumer & prosumer

Provides a **detailed view** of the energy consumption in real-time

Enables consumer to **contribute to CO2 savings**

Enables the **shifting of load** to times with less costs per kWh
